VICTORIA, BC — The Joint High Angle Rope Rescue Team, comprised of specially trained firefighters from the Victoria and Saanich Fire Departments, will be performing technical rope rescue scenarios on Tuesday at the Shoal Point condominium.

Media is invited to learn more and see the team in action as they rappel from the rooftop of Shoal Point, performing high angle stretcher rescues from this seven-storey high-rise. The exercise will take place rain or shine.

What: Joint High Angle Rope Rescue Team Scenarios
When: Tuesday, May 24, 2011, from 11 a.m. to noon
Where: Shoal Point, 21 Dallas Road

Established in 2007, the Joint High Angle Rope Rescue Team serves the Capital Region and has provided high angle rope rescues in a variety of situations, such as elevator shafts, construction sites, tower cranes, high-rise buildings, scaffolding, and steep banks and ravines.
