Construction begins on Pandora Green Streetscape Project

Date: Wednesday, April 20, 2011

VICTORIA, BC — The City of Victoria has begun construction on the Pandora Green Streetscape Project, a beautification project designed to revitalize and calm traffic along one of Victoria’s busiest gateways into downtown.

The beautification plan to enhance the south streetscape of the 900 Block of Pandora Avenue, between Quadra and Vancouver streets, was developed in consultation with neighbouring residents and organizations.

Construction begins with concrete and underground work. The project is expected to be completed by the end of July.

The streetscape project will include road and sidewalk improvements. Decorative surfaces and heritage style lighting will create a new, dynamic public space for community gatherings and events, and improved pedestrian access in the neighbourhood.

City crews will make every effort to minimize disruption to pedestrians, vehicle traffic, residents and businesses during construction. A traffic management plan is in place and signs will be clearly posted on the site.
