Johnson Street Bridge Closure for Rail Bridge Dismantling

Date: Friday, February 24, 2012

VICTORIA, BC – Preparatory steps are now complete. The Johnson Street Bridge will close to all vehicle, cyclist and pedestrian traffic at approximately 11:45 a.m. today for the removal of the rail bridge by crane.

Public works staff and VicPD will be on site to divert traffic.

Anyone wishing to view the rail bridge coming down is encouraged to find a location a safe distance away from the bridge. The best views will be north of the bridge, on both the east and west sides.

The project webcam will be capturing live coverage of the rail bridge removal. The public is encouraged to visit www.JohnsonStreetBridge.com for the latest traffic updates and to check out the webcam.

An advisory will be sent out when it reopens.
