VICTORIA, BC – Victoria’s water mains are “flushed” annually to remove sediment and deliver high quality drinking water. Weather-permitting, the City of Victoria will begin water main flushing on Monday, April 2 in the areas of Hillside Avenue/North Dairy Road and Richmond Avenue/Fort Street.

During this time, some water discolouration can be expected and short periods of low water pressure may be experienced. To prevent any staining from discoloured water, run tap water until clear. Commercial establishments such as laundromats, beauty salons, and hotels and restaurants can contact Public Works at 250.361.0400 for further details and advance warning of flushing dates in their specific location.
