

Sewer Main Repairs - Hillside/Quadra Intersection

Date: Monday, December 3 2018

For Immediate Release

VICTORIA, BC — Drivers in the area of the Hillside/Quadra intersection can expect delays starting Monday December 10, as crews complete repairs to a damaged section of sanitary sewer infrastructure in the intersection and complete road repairs. This work will complete a Hillside Avenue sewer main replacement project started earlier this year.

While all efforts have been made to minimize impacts to the travelling public, the extent of the repairs require reducing traffic to one lane in all directions, 24 hours per day. The work is scheduled to be complete by Sunday, December 17. Electronic message boards will be in place on major streets in the area to advise the public about the upcoming work.

All sidewalks on Quadra Street and Hillside Avenue will remain open for public use. Single lane traffic will be maintained in all directions, however, all left turns will be restricted to minimize delays at the intersection. Motorists are requested to obey flag-persons and reduce speed through the construction area to ensure safety for workers and pedestrians.

Transit riders are advised to look for instructions from BC Transit regarding any temporary bus stop closures adjacent the intersection. Local access to businesses will be maintained, however, congestion can be expected in the area. Motorists are encouraged to use alternate routes during this time, if possible.
