- 9 A development permit issued within two years before the commencement of this bylaw continues to apply, with the necessary changes and so far as applicable, as if it was issued in respect of the New Mobility Regulations. Without limiting the generality of the foregoing, a building permit or business license that is consistent with such development permit may be issued as if it complied with the New Mobility Regulations, provided that a complete application and associated fees for same are received by the City within two years of the commencement of this bylaw.
- 10 If prior to the commencement of this bylaw, Council or the Director has authorized the issuance of a Permit under the Old Parking Regulations, but the Permit had not been issued prior to the commencement of this bylaw, then either

- (a) the Council meeting considering approval takes place no later than one year after the commencement date of this bylaw;
 - (b) there are no significant alterations or differences in the development from that considered by Council at the time of the motion to advance it to the Council meeting considering approval other than those required to meet the New Mobility Regulations; and
 - (c) subject to (d), all terms and conditions of the Council or Director authorization are met;
 - (d) if the development provides parking, or a combination of parking, transportation demand measures and cash in lieu that satisfies the New Mobility Regulations without variance, then the owner is relieved from an obligation imposed by any Council resolution to register a legal agreement addressing transportation demand management measures in relation to the development; and
 - (e) other than the exception at (d) the intent of the Council motion remains unchanged.

- 13 For certainty, nothing in sections 6-10 is intended to modify or extend the validity of any Permit beyond the time that it would lapse or expire but for those sections.
- 14 Sections 6 through 11 are repealed on the day after the date that is two years after the commencement date of this bylaw.

Zoning Bylaw No. 80-159
Schedule C:
Off-Street Parking Regulations

1. Parking Requirements

1.1 Application of Requirements

1. Where there is a percentage or decimal calculation in Schedule C, if the product of the calculation results in any decimal value equal to or over 0.50, it shall be rounded up to the nearest integer, and all lower values are rounded down to the nearest integer. For clarity, this section 1.1.1 does not apply to the thresholds indicated by the phrase “or part thereof”, wherever such thresholds appear in Schedule C.
2. Where a building contains more than one use:
 - (a) the total number of parking spaces required shall be the sum of the number of parking spaces required for each use, or type of use, calculated separately; and
 - (b) common space shared between different uses (including, but not limited to, hallways, lobbies, washrooms, and staircases) is excluded from floor area calculations, for the purposes of Schedule C.
3. If a use is not specifically listed in **Table 1** or **Table 4** of this Schedule, the number of parking spaces required shall be calculated on the basis of a use or class of use that is most similar to the actual use, based on parking demand characteristics.
4. Unless otherwise stated, all references to “floor area” in this Schedule shall be calculated as total floor area.
5. For the purpose of calculating parking requirements under this Bylaw, in addition to all internal floor areas, all outside seating and serving areas located on a lot and associated with a Restaurant or a Drinking Establishment use shall be counted as floor area.
6. Accessible parking spaces and van accessible parking spaces are calculated based on the baseline parking rate in **Table 1** prior to any reductions, exceptions or exemptions permitted in this Bylaw or the Local Government Act, or granted through the approval of a variance.
7. Where a change of use is occurring within a building, this Schedule does not require any additional mobility elements where:
 - (a) the proposed new use is permitted under the existing site zoning; and
 - (b) no additional floor area is being created.
8. If additions are proposed to a building existing on the date of adoption of this bylaw, the requirements of this Schedule apply but with respect to the building addition only.
9. If the boundary of an area shown in Schedule T or Appendix 1 bisects a lot, then for the purposes of section 1 of this Schedule:
 - (a) the lot is deemed to be wholly within that area where section 1 of Schedule C requires the owner or occupier to provide the lowest total number of off-street vehicle parking spaces for the uses present on the lot or in the building or other structure; and
 - (b) the calculation under section 1.1.9(a) must be made without factoring in any reduction available under section 1.2.2(g) or 1.2.2(h).
10. If the boundary of an area shown in Schedule T or Appendix 1 bisects a lot, then for the purposes of section 5 of this Schedule:
 - (a) the lot is deemed to be wholly within that area where section 5 of Schedule C requires the owner or occupier to provide the highest total value of transportation demand management measures (TDM) for the uses present on the lot or in the building or other structure; and

- (b) the calculation under section 1.1.10(a) must be made without factoring in any reduction available under section 5.1.2(d) and must be calculated using the value of each Transportation Demand Management measure as set out in Tables 9 and 10.
- 11. The owner or occupier of any land or any building or other structure, for each use present on the land or in the building or other structure must provide each mobility element recorded on the approved set of plans attached to or referenced in the development permit for that land, building or structure.
- 12. Each failure to provide a mobility element recorded on the approved set of plans attached to or referenced in the development permit for that land, building or structure is a separate contravention of this Bylaw.

1.2 Required Vehicle and Bicycle Parking Spaces

- 1. The owner or occupier of any land or any building or other structure, for each use present on the land or in the building or other structure, must provide off-street vehicle parking spaces in accordance with **Table 1**.
- 2. Notwithstanding 1.2.1, the minimum parking space requirements set out in Column B of **Table 1**:
 - (a) do not apply to any lot located within the Downtown Core Area, as shown in Appendix 1 Map A;
 - (b) do not apply to any residential use on a lot located within a Transit Oriented Area as shown on Schedule T – Transit Oriented Areas;
 - (c) are reduced by 50% on any lot that is located within a Major Mobility Hub, as shown in Appendix 1 Map B;
 - (d) are reduced by 30% on any lot that is located within the Transit Priority Area, as shown in Appendix 1 Map C;
 - (e) do not apply to affordable housing developments;
 - (f) do not apply to a lot where there is no more than one attached dwelling or multiple dwelling of 6 dwelling units or less;
 - (g) can be reduced by providing Transportation Demand Management measures as described in **Table 2**;
 - (h) can be reduced by providing Cash-in-Lieu of Motor Vehicle Parking in accordance with **Table 3**.
- 3. Notwithstanding section 1.2.1, the minimum visitor parking space requirements set out in Column C of **Table 1**:
 - (a) do not apply to a lot where there is no more than one attached dwelling or multiple dwelling of 6 dwelling units or less.
- 4. Notwithstanding section 1.2.2 (f) and section 4.1.1, where vehicle parking is provided on a lot where there is no more than one attached dwelling or multiple dwelling of 6 dwelling units or less, then the first vehicle parking space on the lot must meet the minimum van accessible parking space dimensions as shown in Figure 5.
